

Essentials Battery Powered Simulated TV

Multi-coloured LEDs which produce light of varying intensity and colour to give the illusion a television is being watched.

- 3 x AAA batteries (not included)
- 6 multi-coloured LED
- Random sequence of light
- On/Off operation
- 15 degree angle
- Compact & portable unit

People often leave lights or TV's on to give the appearance that someone is home. This unit is an energy saving alternative, providing the same illusion that a property is occupied.
